

TUBE-LUBE® 346

35300 SERIES

This product is specifically designed for those extra heavy-duty cable installations and although the **TUBE-LUBE® 326** is an all purpose lubricant and quite suitable for heavy cables, there are those that will insist on using a more traditional type of gel type lubricant.

The TUBE-LUBE® 346 fits that bill.

Available only in 5 gallon pails, TUBE-LUBE® 346 is compatible with all cable jackets and all types of ducting.

The product is a heavy duty gel that should be applied to the cable as it enters the ducting and will stay on the cable throughout the pull.

This product can be used in temperatures between 14 and 120 degrees F.

LUBE SPREADER

00510 SERIES

This product is designed to spread DCD TUBE-LUBE® 346 (or similar) around the walls and along the length of the duct, while also acting as a connector.

The body is constructed out of stainless steel and the polyurethane disc has angular grooves which allow better distribution of lubricant.
