

PULLING GRIPS

00681 series TRIPLE WEAVE – SINGLE EYE – SHOULDERS

These grips offer a Flexible Eye with Shoulders and Triple Weave galvanized wire construction. The shoulders help to protect the leading edge of the cable or ducting and this type should be used for heavy duty applications.

00695 series DUAL WIRE – DOUBLE WEAVE – HIGH STRENGTH – SHOULDERS

These extra high strength grips feature a dual wire, double woven construction. This type of grip should be used for heavy duty applications such as overhead transmission wire. The grips are particularly suited to bare conductor and synthetic rope applications.

When pulling rope of any type, it is very difficult to sleeve the grip over the rope and we recommend use of the Feed tube shown below.
