

## SUPPORT GRIPS

Cable Support Grips are used for supporting any kind of cable in permanent installations. They can be used in either horizontal or vertical installations.

The DCD grips are manufactured of galvanized steel wire for indoor or under cover installations. For installations where they could be affected by weather conditions, Stainless Steel versions are available for all types.

DCD offers three basic types of eye...Single, Double or Offset. Each type is available in Single weave for light duty applications, Double weave for heavy duty applications or Lace-up weave when the cable end is not available for sleeving the grip over. See the following pages for details.

Support Grips are not stocked in large quantities because they are often only used in annual supply contracts for Utilities. In most cases, stock is created only to satisfy specific demands. Please allow 4 to 6 weeks for delivery except for casual quantities.

Always contact Customer Service for availability.

### 00800 series SINGLE EYE – SINGLE WEAVE – CLOSED MESH – GALVANIZED OR STAINLESS STEEL

For permanent installations where the cable end is available for assembly of the support grip.

Galvanized Part No.	Stainless Part No.	Size Range	Mesh Length	Approx. Breaking Strength*	Weight
