

TUF-Lugger™ Manhole Adapter 40000-300 series

The Manhole Adapter is designed to straddle the open manhole and provide an anchor point for the TUF-Lugger.

The Manhole Adapter will work with manholes from 18" to 36" and has two tabs that locate inside the manhole for safety. These are easily adjustable without the need for any tools or wrenches.

The "bridge" through which the cable is pulled, slides easily along the length of the Adapter allowing easy positioning to match the cable location. In the event of difficulties during the pull, the entire unit can be assembled around or removed from already positioned pull rope or cable.

The unit is mostly aluminum and is lightweight and easy to handle.

A 6" Duct Guide (not included) must be used to locate the TUF-Lugger in the Manhole Adapter.

Part No.	Description	Weight
40000-300	Manhole Adapter	53 lb.

Floor Mounting Frame 40000-400 series

The Floor Mount Frame is designed to be secured to a concrete floor and provide an anchor point for the Power Pack. The construction is simple and assembly of the Power Pack takes only minutes. (Caution must always be exercised to use the correct securing bolts - 5/8" Hilti Bolts or equivalent - and to install them as per the manufacturer's recommendations.)

Part No.	Description	Weight
40000-400	Floor Mounting Frame	22 lb.

Universal Extension 40000-500 series

The Universal Extension frame is designed to get to those really hard to reach corners and still be able to locate the Duct Guide squarely into the ducting.

It mounts directly onto the end of the standard TUF-Lugger™ with all the existing hardware that comes with the TUF-Lugger™. The unit has the ability to be rotated 90 degrees in either direction thus giving total flexibility inside a manhole to reach any location. The Universal Extension is provided with short aluminum tubes, but it is likely that they will not be suitable for all applications. It is up to the contractor to obtain 2" pipes of a length to suit any particular application.

The outboard end of the Extension is identical to that of the TUF-Lugger™ thus allowing the normal use of the Duct Guides.

It is possible to assemble more than one of these Extensions such that when coupled together, they provide the ability to fully turn a corner.

Care must be taken when assembling this Extension because until load is put onto the TUF-Lugger™, the entire unit will be very unstable – once load is applied, all the arms will tighten up under the tension and it will again become stable.

Part No.	Description	Weight
40000-500	Universal Extension	43 lb.
