

## ULTRA LIGHT BIRDS

### 58320 series

The Ultra-Light birds are unique to DCD. They are made out of polyurethane and, as the name implies, are about half the weight of the regular Line Darts.

The cones are very tough yet extremely thin – so thin, in fact, that they can be easily inverted in the event that the dart gets stuck and it is necessary to pull them back out.

| Part No.   | Nom. Duct Size               | Weight  |
|------------|------------------------------|---------|
| 58320-200* | 2"                           | 0.6 oz. |
| 58320-250* | 2-1/2"                       | 0.7 oz. |
| 58320-300* | 3"                           | 1.3 oz. |
| 58320-350  | 3-1/2"                       | 1.6 oz. |
| 58320-400* | 4"                           | 2.2 oz. |
| 58320-500  | 5"                           | 3.2 oz. |
| 58320-600* | 6"                           | 4.8 oz. |
| 58320-KT1  | Includes above parts marked* |         |

## INFLATABLE BIRDS

### 58330 series

Although many companies offer this Inflatable style of bird, the DCD units are stitched for greater strength. The purpose of the Inflatable is to be able to blow through ducting already containing cable.

| Part No.  | Nom. Duct Size           | Weight  |
|-----------|--------------------------|---------|
| 58330-075 | 3/4" - 1-1/4"            | 0.1 lb. |
| 58330-150 | 1-1/2" - 3"              | 0.2 lb. |
| 58330-300 | 3" - 4"                  | 0.3 lb. |
| 58330-500 | 5" - 6"                  | 0.4 lb. |
| 58330-KT1 | Includes all above parts |         |

## PARACHUTE BIRDS

### 58335 series

These are a new addition to the DCD range of blowing darts. With the large open mouth, the Parachutes are able to grab all the air blown into the duct and will travel faster and further than any other model. They can also be used in occupied duct.

| Part No.  | Nom. Duct Size           | Color Code |
|-----------|--------------------------|------------|
| 58335-100 | 1" - 2"                  | Red        |
| 58335-200 | 2" - 3"                  | Blue       |
| 58335-300 | 3" - 4"                  | Brown      |
| 58335-400 | 4" - 6"                  | Green      |
| 58335-KT1 | Includes all above parts |            |

## CONTROL VALVE

### 58000 series

The Control Valve is an integral part of the DCD Blowing system. A ball valve allows control of air flow and quick disconnect fittings are attached both ends. Three Rope Guides are included with each Control Valve purchased.

| Part No.  | Description                   | Weight   |
|-----------|-------------------------------|----------|
| 58000-000 | CONTROL VALVE c/w rope guides | 2.00 lb. |
| 58000-188 | ROPE GUIDE - 3/16"            | 0.07 lb. |
| 58000-250 | ROPE GUIDE - 1/4"             | 0.07 lb. |
| 58000-375 | ROPE GUIDE - 3/8"             | 0.07 lb. |
