

LINEMAN LASHER

61400 series

The Lineman™ Lasher is the pull type cable lasher for tough jobs, especially the ones that always seem to come up at night and in dusty, wet or icy conditions. Use it to lash single or multiple cables up to 3" outside diameter and for single and double overlapping. It is perfect for lashing CATV and fiber optic cable.

The Lineman™ does not require any traction with the strand. It simply uses tension from the lashing wire to drive rotation. This is a key factor in icy or wet weather.

You won't get snagged in trees and tight places with the Lineman™ Lasher because of the smooth-faced, tapered cowl. The fast, easy transfer around poles for continuous lashing is important, especially if you are paid or are paying by the foot, the Lineman™ Lasher cuts transfer time by as much as one-third. The wire quick-release trigger mounts below the handle for easy, one-hand engagement and release.

Versatility means less downtime and smooth operation.

The tough, precision drive system needs no adjustment and delivers even lashing action. A key feature is that the Lineman requires no strand traction to drive rotation – this means you can now lash in any weather. The strand brake keeps wire tight prevents the lasher from sliding backward when forward motion is halted.

The Lineman™ Lasher holds up to 1200 ft. per coil of 0.045" lashing wire without reloading, and works compatibly with up to 1/2" strands. A flat base ensures the lasher won't roll around in transit. An ergonomically engineered handle and controls add to total precision performance.

| Part No. | Model | Max Strand | Max Lash | Wire Size | Spool Size | Overall Dimensions | Weight |
|-----------|---------|------------|----------|-----------|--------------|---------------------|--------|
| 61400-000 | Lineman | 1/2" | 3" dia. | .045" | 1200 ft/coil | 19-1/2" X 12" X 12" | 38 lb. |

EAGLE LASHER

61700 series

The all new Eagle Lasher is the last word in aerial cable lashing. If you are installing 1 or 2 small fiber optic cables or coaxial cable, then why use a larger lasher when a small one will do the job. The new Eagle weighs just 24 lbs. Imagine how easy that would be for transferring around poles or lifting in to position.

Like all the DCD lashers, the Eagle does not need traction from the strand to drive it, it uses the tension from the lashing wire to do that. With a bundle capacity of 2-1/4" or single cable up to 2", this lasher will single or double lash most Telecom or CATV installations.

This lasher uses standard wire spools that are loaded into a drop down holder which offers added convenience.

| Part No. | Model | Max Strand | Max Lash | Wire Size | Spool Size | Overall Dimensions | Weight |
|-----------|-------|------------|-------------|---------------|--------------|--------------------|--------|
| 61700-000 | Eagle | 3/8" | 2-1/4" dia. | .038" - .045" | 1200 ft/coil | 18" X 8" X 8" | 24 lb. |
