HAND RODDER ACCESSORIES

These accessories all attach to the end of the Hand Rodders and all are fitted with female 3/4" - 10NC threads to screw onto the male thread of the rod.

The Heavy Duty Brushes are available in the more common duct sizes and would be used to clean out the duct prior to placing cable.

The Grapplers are used in the event the rodders are pushed towards each other from opposite ends of the duct. The Coupling halves will hook together and can then be pulled back from either end.

The Pulling eye can be attached to the rodder in order to tie off a pull tape or rope so that it can be pulled back through the duct.
