

DUCT ROD ACCESSORIES

All Duct Rodders are offered in Standard or Deluxe packages. Separate Accessory Kits are available with contents listed in the table below. All accessories are also designed to fit Rodders by other manufacturers and most of their accessories will fit the DCD Rodders.

The larger 5/16", 3/8", 7/16" and 1/2" Rodders are supplied with Stainless Steel accessories and all components attaching directly to the rod are designed to be glued on in the traditional manner, or can be attached by means of four clamping set screws, or can be both glued and screwed (the accessories supplied on the product at the factory are attached by screws only - they can be glued by the customer if required).

The obvious advantage of the clamping system is that repairs or product changes can be carried out easily in the field with no time delay to allow the glue to dry. Spare set screws and hexagon keys are also supplied.

ACCESSORY KITS 57000 series
